ROAD MODE

In road mode, the central skull position, our electronic control module is completely disconnected and your bike performs as it did before the device was installed and you can ride your bike as you always have.

SPORT MODE

Is the mode for hills.

It give you lightness and offer better rideability.

Is key to achieving a bike that is more reactive and fun to ride.

Selecting Sport mode gives the rider sport-style Ride-by-Wire throttle response.

Electronic controls are set to give riders perfect dry road ride responsiveness.

CITY MODE

The mode for urban ride or highways.

Perfect for relaxing riding, reduces fuel consumption by 20% and engine temperature.

Perfect for practicing on a new bike.

Reducing on-off of the engine response.

RAIN MODE

Technological solutions that keep you safe on the road.

For the first time you can upgrade your bike with the latest technology system for the world of two

wheel.

It ensures safe riding on difficult routes or adverse weather conditions.

Looking to stay safe in the rain?

Let's take a look at Storm mode that will keep you riding no matter what weather you encounter.

Riding a bike in the rain is often not planned.

It doesn't necessarily mean it's for when it is raining.

A road can be slippery a long time after the sun comes out...

Smooth acceleration will greatly improve your safety while riding your motorcycle in the rain.

Smooth inputs will prevent a sudden loss of traction which might cause a crash.

Rider aids are there to help you and can be easily tailored to the way you ride, the conditions, and the bike.

The choice of placing the skull selector in the indicated position offers the insertion of the Rain map in an easy and immediate way without distractions, even when wearing gloves and in case of poor visibility.

Selection couldn't be easier

Rider aids are there to help you and can be easily tailored to the way you ride, the conditions, and the bike.

The ride by wire technology is 100% reliable.

ANARCHY MODE

BIG TORQUE INSTANTLY

Anarchy mode generate controlled torque at lower RPM, meaning that your bike can have impressive acceleration. You will discover a particularly pleasant riding experience, hard to reproduce with a stock or built bike as well.

THE FUN FACTOR

Was created to keep you safe and entertained with high performance and unparalleled riding experience. With anarchy mode, torque is provided instantly, from the moment you twist the throttle. You'll instantly feel a difference in the ride the first time you twist the throttle.

A lot of your questions can only be answered with an experience

Instant torque, zero lag and Fun to ride factor. Because performance is always about time.

The riders discovers a bike capable of continuously delivering high power, from the get-go, without any modifications at the engine.

Doesn't improve power and doesn't change any value of your Ecm. But completely change performance for impressive acceleration. You will reach speed much much faster.

Performing and 100% reliable.

Just remember each time you restart the bike in the Anarchy mode you have to re-select the mode.
